
Test

GSM / WCDMA Systems Operation Handling in MSC/BSC

Intentionally Blank

Table of Contents

Topic	Page
AXE GENERAL.....	1
MSC BASIC OPERATIONS.....	5
BSC BASIC OPERATIONS	7

Intentionally Blank

AXE GENERAL

1. The Application Modules are used to
 - a) Implement application oriented functions in a flexible way
 - b) Connect the new hardware.
 - c) Replace the XSS.
 - d) Perform generic (platform) functions
2. OSS and CN-OSS are software packages
 - a) On the AXE for Input Output functions
 - b) On a separate (Unix) platform for AXE management functions
 - c) On a separate (Unix) platform for Network Management functions
 - d) On the AXE for Network Management functions
3. AXE MML commands have
 - a) 6 letters and no parameters
 - b) 4 letters and sometimes parameters
 - c) 5 letters and (if present) a parameter block with one or more parameters and (if used) parameter values
 - d) 5 letters, parameters and parameter values
4. How many Extension Modules can be connected to an RP-pair ?
 - a) 8
 - b) 16
 - c) 32
 - d) 64
5. Which general types of routes exist in AXE ?
 - a) Outgoing routes, Incoming routes, signaling routes
 - b) Low capacity routes, high capacity routes, very high capacity routes

- c) External routes, internal routes (announcing machines, signaling) and software routes
 - d) SS7 routes, CAS routes , traffic routes
6. Name one command to print out the connections of a device
- a) EXDRP
 - b) EXDEP
 - c) ANRSP
 - d) ANBSP
7. What are the tasks of the TSMs and the SPMs in the Group Switch ?
- a) To connect an incoming channel to and an outgoing channel to be able to send speech samples from the A-subscriber to the B-subscriber
 - b) To switch date and time to the B-subscriber
 - c) To create outgoing and incoming routes routes
 - d) To connect devices for speech transmission
8. Which of both is directly connected to the Group Switch, the SNT or the DIP ?
- a) The Digital Path (DIP)
 - b) The Switching Network Terminal (SNT)
 - c) Both
 - d) None of these
9. Which new hardware is implemented in the MSC in the Core Network of WCDMA Systems?
- a) RPPs in the Packet Control Unit (PCU)
 - b) ATM Line Interface (ALI), Transcoder and Rate Adapter (TRA) R5B and High Speed Signalling Links (HSL)
 - c) Echo Canceler Pool (ECP) devices
 - d) CN-OSS
10. Explain the difference between Local and Global Size Alteration Events?

- a) Local Size Alteration: Size Alteration in one block;
Global Size Alteration: over several function blocks;
 - b) Local Size Alteration: in one Local Exchange; Global
Size Alteration: over more than one exchange
 - c) Local Size Alteration: in more function blocks; Global
Size Alteration: in one function block
 - d) Local Size Alteration: in more Exchanges in the network;
Global Size Alteration: in one exchange
11. What is the function of supervision functions on a route ?
- a) To monitor whether a fault situation occurs
 - b) To monitor the traffic load
 - c) To register traffic measurements
 - d) To keep data about the traffic for charging purposes
12. What is the normal function of SPG-1?
- a) SPG-1 handles alphanumeric devices and alarms
 - b) SPG-1 handles data (charging, statistics)
 - c) SPG-1 is responsible for data communication (DCS)
 - d) SPG-1 is responsible for the connection with the RP Bus
13. What is the APG40 used for ?
- a) The Adjunct Processor Group 40 is the replacement of
the IOG and is mainly used for IO functions
 - b) The Adaptive Processor Group 40 is used for Adaptive
Multi-Rate (AMR) voice coding
 - c) The Adjunct Processor Group (APG) 40 is connected to
the IOG and handles the charging
 - d) The Analog Processing Group is used for subscriber
connections
14. What file is always used for an automatic dump from the CP ?
- a) The file with Call Detail Records (CDRs)
 - b) The file RELFSW0
 - c) The First File Range RELFSW0 – RELFSW99
 - d) The Second File Range RELFSW100 – RTELFSW127

15. What is the meaning of MTP?
- a) Multiple Choice Test Procedure
 - b) Measurement Timing Program
 - c) Message Transfer Part
 - d) Measurements Time Protocol
16. On which SS7 layer is the Network Routing handled ?
- a) MTP 1
 - b) MTP 2
 - c) MTP 3
 - d) SCCP

MSC BASIC OPERATIONS

17. What is the meaning of the parameter SP in the Routing Case Data ?
- a) Signalling Point
 - b) Switching (Class) Program
 - c) Sending Program
 - d) Switching Point
18. Which Analysis table is first to be changed in case of implementing new Charging Data ?
- a) Charging Case data table
 - b) Tariff data table
 - c) Tariff Class data table
 - d) Switching Class data table
19. Which command is used to printout the B-Number Analysis Data ?
- a) ANBSP
 - b) ANBAP
 - c) ANBPP
 - d) ANBTP
20. In which Analysis table is indicated who is to be charged ?
- a) Charging Case data table
 - b) Tariff data table
 - c) Tariff Class data table
 - d) Switching Class data table
21. In which Analysis table is decided to route the call to an AST-DR ?
- a) B-Number data table
 - b) End-of-Selection data table

- c) Routing Case data table
- d) Charging Case data table

22. What is the result of the Pre-Analysis of the B-number?

- a) Routing Case
- b) Origin for B-Number Analysis
- c) B-Number Type
- d) Numbering Plan Indicator

23. Which command is used to specify a Traffic Recording Time Schedule?

- a) TRRPI
- b) TRTSI
- c) TRRGI
- d) TRTTP

24. What is the purpose of Traffic Measurements?

- a) To get insight in how the traffic flows
- b) Nice to know
- c) To gather data for Network Capacity Planning and Network Dimensioning
- d) Just to keep engineers busy.

BSC BASIC OPERATIONS

25. What types of Cell Data do we have in the BSC?

- a. Cell Description Data, Cell Definition Data, Location Data
- b. Cell Data, Managed Objects, Transcoder Devices, Subrate Switch
- c. Tranceiver Group (TG), Receiver (RX), Transmitter (TX), Time Slots (TS)

26. What is a Managed Object in the BSC?

- a. That refers to Object-Oriented Modelling: an object (unit of software) to be maintained.
- b. A representation in the BSC of a (part of a) RBS.
- c. Hardware Unit
- d. Part of the IOG

27. What is representing a Tranceiver Group (TG) ?

- a. A group of RBSs
- b. One RBS
- c. Tranceiver Units (TRUs)
- d. A group of carrier frequencies.
